### Pumatect Type 3 high build epoxy resin floor coating

Two coats of Pumatect is equivalent in thickness of up to 10 coats of single pack industrial and garage floor paint

#### Description

Pumatect is a thick, high-build two-pack epoxy resin floor paint with a gloss finish. Pumatect is a hard wearing epoxy resin floor paint that offers excellent abrasion and chemical resistance. Anti-slip finishes are available.

#### Thickness

0.4mm from two coats - this is equivalent in thickness of up to 10 coats of single pack industrial and garage floor paints.

#### Appearance

Gloss finish available in a range of colours. A selection of RAL or BS 4800 colours are available upon request.

#### Benefits

- Protects concrete from oil and chemical spillages
- High build with excellent wear resistance
- Gloss, easy to clean finish
- Non dusting
- Light reflective

#### Typical Uses

Pumatect may be used as a hard wearing coloured floor paint in areas such as engineering plants, factories, warehouses, assembly and production areas, vehicle workshops, aircraft hangars and storage areas. Pumatect has excellent chemical resistance

#### Traffic

Pumatect is suitable for regular foot traffic, frequent forklift truck traffic and occasional hard plastic-wheeled trolleys.

#### Application Conditions

The ambient temperature should be 10oC or higher and the concrete floor slab temperature not less than 5oC.

#### Existing Concrete Floors

The building must be wind and watertight and all surfaces in a clean, sound and dry condition. The floor should not suffer from rising damp and must have an effective damp proof membrane. In certain circumstances the application of a surface DPM can prove effective.
