## Commercial Kitchen Flooring - Type 8 very heavy duty polyurethane resin screed

Temperature resistant for cleaning, spillages and discharges up to 120oC

### Description

A very heavy duty, anti-slip, trowel applied polyurethane resin screed for application onto concrete and polymer modified cementitious screeds. A hard wearing, seamless, durable floor with excellent resistance to impact, abrasion and chemical spillages.

### Thickness

6mm heat resistant up to 70oC

9mm heat resistant up to 120oC.

### Appearance

Matt anti-slip finish available in a range of colours

### Benefits

- High temperature cleaning - up to 120oC
- Slip resistant in dry and wet conditions
- Non-tainting
- Seamless
- Very high chemical resistance.

### Typical Uses

May be used as a seamless, hard wearing, anti-slip, coloured floor screed in many industries including commercial kitchens, pot-wash areas, cheese production, dairy processing, abattoirs, meat, poultry and fish processing plants, commercial kitchens, breweries, distilleries and soft drinks manufacturing.

### Traffic

Suitable for high impact and severe heavily loaded traffic.

### Application Conditions

The building must be wind and watertight. The ambient temperature should be 10oC or higher and the concrete floor slab temperature not less than 5oC.

### New Concrete Floors

Minimum 7 days old and visibly dry

### Existing Concrete Floors

All surfaces to be in a clean, sound and dry condition.
